

AMENDMENT TO THE SPECIFICATION

Please amend the specification by marked up replacement paragraph(s) as follows.

Please replace paragraph [33] with the following:

--[33] The assistance data that is transmitted to the devices 103, in an exemplary embodiment, can include ephemeris data differential GPS correct data, timing data and/or other aiding data. Using the aiding (or assistance) data, the telemetry devices 103 ~~performs~~ perform geolocation, calculations, yielding a number of advantages. For example, the telemetry devices 103 can generate real-time speed and route adherence alerts. Additionally, transmission of geolocation data need not be frequent. Transmission of geolocation data is more compact because it is true location rather than pseudo range data. Also, the telemetry devices 103 themselves can determine when the ephemeris data is no longer valid.--
